Claims Rejection Under 35 USC – 112-1ST Paragraph

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 5 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

(a) the magnetic mounts are incrementally adjustable to accommodate the user's specific optical requirements with respect to minuscule calibrations of the auxiliary lens and or display system angle, pitch, roll and yaw; and

(b) said magnetic mounts, provide an automatic "default" setting to which the combination eyeglass and auxiliary lens attachments are drawn when placed in proximity to each other in the approximate positions in which they were contemplated to attach. As recited in claim 5.

Claims Rejection Under 35 USC – 112-2nd Paragraph

4. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The "first set", "complimentary set" and the parentheses as recited in claim 1 are generally narrative and indefinite, failing to conform with current U.S. practice.

In claim 4, the alternative expression "or" renders the claim indefinite.

Claims Rejection Under 35 USC - 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by **Sadler** (5,416,537).

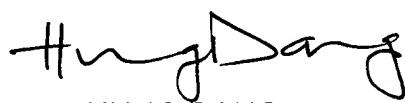

Sadler discloses magnetic means for securing auxiliary lenses to eyeglasses comprises a first set magnetic 13 mounted in the eyeglass frame and a second set of magnetic 17 mounted in the auxiliary lenses 15 for attaching the auxiliary lenses in the eyeglasses frame (see figures 1-3 and the related disclosure.)

Allowable Subject Matter

6. Claim 3 is would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
